0.2 ABOUT ME

Hey there! Thanks for checking out my website. I am a current Global Business and Digital Arts student at the University of Waterloo. I believe design is all about creating (fun)ctional solutions to every day problems in an aesthetically pleasing manner. I want to improve the relationships between people and the products they use in their everyday life by using innovative design solutions to create meaningful user experiences.

If you'd like to know more about me, I check out my Instagram and Twitter.
